## LA GATE WHAT WE DO

We provide top-of-the-line security gates that are free of springs and ceiling-mounted operators. This allows for an extended vehicle clearance of 8'3" to accommodate larger vehicles. We can also customize to fit your application.

Our gates come ready to install with no welding needed and minimal labor. In addition to the simple installation, our gates all come with a 2 year warranty.

Finally, the LFD AutoGate system includes; state-of-the-art security features, including light curtain, edge protection, voltage & Amp protection with 2 levels of security. Administration Mode and Maintenance Mode with password protection.

## CONTROLS CAN BE PLACED ANYWHERE

- Ups battery back-up system included
- Tailgate detection system
- Secure router for secure communications
- Active anti-closure sensor

## FREQUENTLY ASKED QUESTIONS

- What is the time to open/close?  
The gate will cycle smoothly at 5 seconds to open and 5 seconds to close
- How is the gate activated?  
A car shows up and the security system sends an input signal.
- Can the gate withstand inclement weather?  
The gate was not tested for wet environments. It will need to be located under a roof system and not subject to rain.
- Is there rust protection?  
The gate is powder coated. We do not warranty the powder coating.
- What is the lead time to build a single gate?  
Depends on how many you are ordering. We will need a few weeks to get the parts in but we can get up to 10 gates per week.
- Can private property logo be made and placed on gate?  
Yes.
